THE CHINESE UNIVERSITY OF HONG KONG (CUHK)

Motto

博文約禮

Through learning and temperance to virtue.

Emblem

The emblem of the University is the mythical Chinese bird *feng* (鳳) which has been regarded as the Bird of the South since the Han dynasty. It is a symbol of nobility, beauty, loyalty and majesty. The University colours are purple and gold, representing devotion and loyalty, and perseverance and resolution, respectively.

Mission

To assist in the preservation, creation, application and dissemination of knowledge by teaching, research and public service in a comprehensive range of disciplines, thereby serving the needs and enhancing the well-being of the citizens of Hong Kong, China as a whole, and the wider world community.

Vision

To be acknowledged locally, nationally and internationally as a first-class comprehensive research university whose bilingual and multicultural dimensions of student education, scholarly output and contribution to the community consistently meet standards of excellence.

CU MEDICINE

History

Established in 1981, the **Faculty of Medicine** has flourished and grown over the years, adding different schools of various disciplines and churning out groundbreaking medical discoveries as well as graduates of exceptional

talents who have put it on par with its international and local counterparts. The Faculty of Medicine at CUHK has made impressive strides and thrived to become one of the world's top medical schools.

Logo

Two overlapping purple and green apricot leaves have come to represent the Faculty of Medicine since 2013. Apricot trees have long been used to embody the medical profession. While purple is the Faculty's signature colour,

green symbolizes youth and vigour. Mimicking the leaf veins, the Chinese characters of **CUHK** (中大) are embossed on the apricot leaf.

Chinese characters of **CUHK** (中大) are masked in the contours of the leaf veins

The colour green symbolizes youth and vigour of the Faculty

Purple is the Faculty's signature colour

DEAN'S MESSAGE

“

Despite a history of 42 years only, we are proud to be among the top medical institutions in the world. This exemplifies that our efforts in education, research and clinical service have borne fruits. If you aspire to become a doctor with a benevolent heart and mind, or to explore the world of medical science with world-renowned clinician-scientists, CU Medicine is the right choice for you. We look forward to seeing you on CUHK campus in September.

”

Prof. CHAN Ka Leung, Francis

**Dean
Faculty of Medicine**

ASSOCIATE DEAN (STUDENT AFFAIRS)'S MESSAGE

“

CU Medicine is dedicated to offering a personalised learning experience with diverse opportunities to our students. Our MBChB programme and Global Physician-Leadership Stream (GPS) are known to adopt a student-centred approach that empowers students to take charge of their own education and go for their passion. While we take pride in our students' scholarly achievement, our students' well-being is highly valued as well. We believe in teamwork as much as individual talents. We work together to nurture our students prudently, and support them in academic as well as personal level. On behalf of CU Medicine, we cordially invite you to join our big family.

”

Prof. NG Siu Man, Simon

GPS 10TH ANNIVERSARY

The year 2023 commemorates the 10th anniversary of Global Physician-Leadership Stream (GPS). Thanks to the steadfast support and guidance of all faculties, alumni, sponsors and partners of the local and global communities since its establishment, GPS has flourished and become Hong Kong's premier undergraduate programme, consistently achieving the highest median JUPAS admission score for 10 consecutive years. CU

Medicine has demonstrated its success by attracting highly motivated and academically accomplished students. Over the past decade, GPS has admitted near 100 students with perfect scores from both DSE and IB streams. Its teaching philosophy and pedagogy are highly recognised among tertiary educators and valued by prospective students, earning the University Education Award and the Faculty Education Award in 2023.

Prof. Vincent MOK (left) and Prof. Winnie CHU (middle) represented GPS team to receive the Faculty Education Award 2023

To celebrate its 10th Anniversary, **two student-led initiatives** have been launched:

1 GPS 10th Anniversary Book

The book chronicles the journeys of 18 GPS students and alumni, who have pursued their dream and achieved remarkable success locally as well as internationally.

Our students organisers, being eager to inspire devotion and encourage the boundaries-pushing spirit among fellow students, have acted as editors, proofreaders and photographers for the commemorative book.

◀ Now available for purchase at main local bookstores

2 GPS Convention 6 January 2024

The student-led GPS Convention will serve as a celebration of the programme's accomplishments and milestones over the past decade. Over 500 distinguished guests, including HA staff, entrepreneurs, and medical leaders, will be invited to join this

warm and lively occasion, which showcases remarkable accomplishments of GPS students while providing an opportunity for mentors and graduated mentees to reconnect and reflect on the programme's success.

GPS STUDENT ACHIEVEMENTS

**Ms KO Yuet Kiu
Wendy
(MBChB-GPS Yr 6)**

Academic Prizes (2022-2023)

- Dean's List
- Gary French Prize in Microbiology
- CC Wu Outstanding Academic Award (Orthopaedics & Traumatology, Medicine Year 4)
- Kan Tong Po Medical Scholarship (for MED5 & MED6)
- Medicine Year 4 Certificate of Merit for Orthopaedic Module
- Dr. & Mrs. Tzu Leung Ho Outstanding Academic Awards (Gold Medal)
- Wei Lun Foundation Scholarships for the Faculty of Medicine

Medical school is an exciting adventure, but it can also be tough. Here are some tips I hope will help you!

At first, I felt like I didn't belong here because everyone seemed so smart. But many of my peers felt the same, so we formed study groups to share our struggles and support each other. Building a support system is crucial. It's okay to ask for help when you feel overwhelmed. You're not alone! Cherish those who support you, and the memories you create will make the tough times worth it.

Remember, medical school is not just about academics. Take care of your mental health by having hobbies and interests outside of medicine. I enjoyed exercising, reading and singing to relax. I also got involved in student groups and grasped the opportunity to go overseas and explore new places! I learnt a lot about pathology in Seoul and I had a great time exploring Sydney with my friends.

As you embark on your journey to becoming a doctor, take care of yourself both physically and mentally. Build a strong support system, and don't be afraid to ask for help. Best of luck, and I hope to see you at CUHK!

**Mr LAI Ching Hei
Jeff
(MBChB-GPS Yr 6)**

Academic Prizes (2022-2023)

- Dean's List
- Augustine Cheng Prize in Microbiology
- Certificate of Merit for Junior Medical Clerkship
- Dean's Outstanding Academic Award in Medicine Year 4 (1st prize)
- The Tang Family Foundation Scholarship
- Dr. & Mrs. Tzu Leung Ho Outstanding Academic Awards (Silver Medals)

Time has passed by so quickly in CU Medicine for me. In the six years I've been here, our community's togetherness has always stood out to me. We've all experienced highs and lows navigating this difficult field – I myself owe so much to all the patients, friends, and role models I've met here. Everyone doubts themselves sometimes, but we're all following in the footsteps of many great doctors before us, and I trust that you, too, will love the journey that CUHK offers, plus all the friendly people who will provide you warmth along the way.

In our mission to reach each of our potentials, I know that many of us have found that together, we can achieve and attain things that might not have seemed possible going at it alone. Not just academically, I'm certain that you'll thrive and grow so much here, and I hope you'll find joy in sharing what you have with anyone who might need it too.

Lastly, be kind to yourselves, and no matter what this means to you, just go and do it! These years of freedom might slip by quicker than you think. I wish you the best of luck with all of your challenges, and hopefully, I get to see you around in CUHK!

GPS STUDENT ACHIEVEMENTS

Humanitarian Action

NG Shing Him Brandon (MBChB-GPS Yr4)

As an international volunteer, Brandon worked in villages on an outlying island in Uganda, helping with agriculture like monitoring banana trees and teaching children and women conversational English and basic Mathematics. Moreover, as a medical student, Brandon was able to work in a clinic on the island as well as a government hospital in the city centre, learning from their medical system and helping with some clinical procedures, such as cervical cancer screening, IUD implantation, vaccines injection, antenatal check-up, and assisting in labour. In short, it was a service trip involving education, agriculture, and medicine in rural and developing Ugandan regions.

YEUNG Cheuk Sze Jessie (MBChB-GPS Yr4)

Jessie joined a cataract blindness elimination programme in Prey Veng, Cambodia, organized by CCOUC and GX Foundation. The programme offered free cataract surgeries to underprivileged patients. During the trip, Jessie conducted health checks, learned to diagnose cataracts, and observed cataract surgeries at the Mobile Eyecare Treatment Centre under the guidance of doctors and nurses. Besides clinical skills, Jessie helped with logistics and trained local volunteers. The biggest takeaway from the fruitful experience was that the success of humanitarian work does not solely lie in the hands of medical professionals, but also in the concerted effort of all involved parties from various backgrounds.

ADMISSIONS ▸ Requirements^①

MBChB

JUPAS

HKDSE

34+

From 2024 onwards, students are expected to achieve a total score of 34-35 in six graded HKDSE subjects (3C+3X) and an "Attained" level in *Civil and Social Development*.

The subject grades are calculated as:
5** = 7, 5* = 6, 5 = 5, 4 = 4, 3 = 3

The extended mathematics module (M1/M2) is not considered as an Elective, but it contributes to the total HKDSE score if its attained level is higher than that of the worst one of the six graded subjects.

Non-JUPAS^②

IB

≥42

The minimum requirement is a final score ≥ 42 (out of 45), with grades of at least 6, 7, 7 in the Higher Level subjects.

GCE A-Level

4A*

The minimum requirement is 4A* (usually an average mark of $\geq 95\%$), excluding Chinese. Further Maths is not counted as a separate subject. The raw mark of Maths or Further Maths, whichever higher, will count towards the total GCE score.

GPS

HKDSE

AWARDS & SCHOLARSHIPS

University Admission Scholarships

CUHK offers admission scholarships to students with outstanding entrance results. Eligible students will be granted full-tuition coverage, annual allowance and the outgoing exchange scholarship of up to HK\$80,000 per year*.

* Tenable for the normative period of study programme subject to satisfactory academic progress. Please visit CUHK website for more information.

Qualification

Outstanding academic or non-academic performance

JUPAS:

Bases on HKDSE results

Non-JUPAS:

- Bases on examination results of GCE A-Level / IB Diploma / SAT / OSSD / B.C.
- Diploma (or equivalent) / ATAR / Taiwan GSAT / Cambridge Pre-U, etc.

Application

No application is required. The University will identify qualified new students.

Our students are eligible for a wide range of territory-wide, university, college and faculty-based scholarships. The University, its Colleges and the Faculty of Medicine offer over 1000 scholarships and awards to our students who achieve academic excellence, demonstrate outstanding leadership, and perform dedicated extracurricular and community services.

TEACHING FACILITIES

Choh-Ming Li Basic Medical Sciences Building (BMSB)

CUHK

The BMSB is a dedicated teaching and learning complex for the undergraduate students of the Faculty of Medicine.

Designed to heighten effectiveness and efficiency for education excellence, the building was renovated recently with refurbished modern classrooms, state-of-the-art teaching laboratories, computer rooms, and a spacious learning common with rooftop garden that can accommodate more than 130 guests.

Dissecting Laboratory

Choh-Ming Li Basic Medical Sciences Building (BMSB), CUHK

We take special pride in our modern dissection laboratory - one of the finest in the world for hands-on dissection training and life-and-death education. Students learn valuable lessons and anatomy knowledge from the “silent teachers” and develop a deep sense of gratitude and respect for those who donated their bodies to science.

Since the launch of the “silent teachers” programme in 2011, over 21,873 donors have registered to contribute to the development of local healthcare education and research as of June 2023.

TEACHING FACILITIES

Prince of Wales Hospital

(Major Teaching Hospital of CU Medicine)

30-32 Ngan Shing Street, Shatin

As the largest teaching hospital of CU Medicine, the Prince of Wales Hospital has worked closely with the University to nurture over 5,000 healthcare professionals, while supporting our medical research initiatives over the last few decades.

Occupying an area of around 10.5 hectares, the 1,700-bed regional acute hospital provides a comprehensive range of secondary, tertiary, and quaternary healthcare services through its many multidisciplinary teams, offering patients state-of-the-art medical care and cutting-edge treatment of many complex and rare diseases.

The Phase II redevelopment project commenced in 2017 will provide additional space to meet the increasing service demand and operational needs.

CUHK Medical Centre

9 Chak Cheung Street, Shatin

The CUHK Medical Centre (CUHKMC) is a non-profit, private teaching hospital wholly owned by The Chinese University of Hong Kong (CUHK). With a social mission to bridge the service gaps between private and public healthcare in Hong Kong, CUHKMC is dedicated to offering quality healthcare service at affordable and transparent package prices. In line with the not-for-profit principle, all surpluses from all healthcare services will be ploughed back to the hospital for hospital development and the Faculty of Medicine, CUHK for research and teaching.

TEACHING FACILITIES

Li Ping Medical Library

📍 Lui Che Woo Clinical Sciences Building, Prince of Wales Hospital

The Li Ping Medical Library provides an extensive collection of clinical and medical sciences resources in print and electronic formats to support the needs of students, faculty, and researchers. The design of collaborative learning space and individual study areas can cater to users with different learning styles.

The Library provides 24-hour access for users daily, except for a few sections.

Kai Chong Tong Clinical Skills Learning Centre

📍 Lui Che Woo Clinical Sciences Building, Prince of Wales Hospital

To help students develop physical examination skills and clinical procedures as part of our integrated systems-based medical curriculum, the 8,000 square feet Learning Centre features 7 consultation rooms, 6 open-space demonstration/lecture rooms, and a control room.

In addition to hosting scheduled supervised physical examinations and clinical procedure training sessions, the Centre maintains a collection of more than 200 models, manikins, compact discs and online materials for medical students who are interested to know more about these topics.

TEACHING FACILITIES

CUHK Jockey Club Minimally Invasive Surgical Skills Centre (MISSC)

Li Ka Shing Specialist Clinic (North Wing), Prince of Wales Hospital

Opened in 2005, MISSC is the first training centre that offers minimally invasive, robotic and endoscopic surgical training in the Asia Pacific region.

The centre comprises the well-equipped Robotic & Minimally Invasive Surgical Skills Laboratory, Microsurgical & Endoscopic Skills Laboratory as well as Simulated Operating Theatre, which facilitate hands-on training and research.

New Teaching-Research Complex

Area 39, CUHK

A new Teaching-Research Complex of 56,670 sq.m (CFA) is to be established in Tai Po Area 39. With increasing student enrolments at our medical school and great demand of healthcare professional education and training, a wide range of state-of-the-art facilities and specialised infrastructures will be provided in the Complex to facilitate the teaching and research in precision medicine.

Being one of the important projects under the Faculty's expansion schemes, the Complex will be an innovative, forward-thinking research/ academic headquarter, as well as a flagship building for the Faculty in the years to come. We look forward to the grand opening of the Complex by the end of 2026.
